FRONT END DEVELOPER

Front-End Developer specializing in React.js, TypeScript, and NestJS, with experience in CI/CD, Responsive Design, and Azure deployments. With nearly 3 years in web development for large companies and startups, I have built complex applications using Tailwind CSS and APIs. Focused on performance optimization and high-quality code, I develop scalable and efficient systems that enhance usability and performance

---

PROFESSIONAL EXPERIENCE

5IG Solutions.   **January 2024 - October 2024**

Full Stack Developer

In my previous role, I developed the company's main homepage from coding to deployment using React, ensuring a seamless user experience. By integrating code with Power Automate and I automated processes. Utilizing Dataverse as the primary storage, I managed and integrated data. I implemented advanced form logic with React components and created custom React hooks to enhance performance and maintainability across the codebase. Additionally, I developed an AI-driven algorithm in Python for product recommendations capable of processing multiple data sources, which elevated user engagement.

5IG Solutions.   **January 2023 - January 2024**

Full Stack Developer at AT&T

As a Full Stack Developer, I contributed to building the company's flagship website using React.js, Node.js, and SQL, now serving over 150,000 daily users. I optimized databases and backend processes, reducing server response times with advanced SQL techniques. I mentored team members on front-end code optimization, enhancing overall code quality. Under expert mentorship, I mastered database management and SQL optimization, elevating system performance and reliability.
